

Fruiting false mallow shown above pen for scale; note plant's small size due to dolomitic rocky growing conditions.

Robust cultivated false mallow plants with flower buds, immature fruit, and reddish mature fruit (latter at upper right.)

Robust cultivated false mallow in rare open bloom; most false mallows have cleistogamous (closed) blooms.

False mallow habitat with right of way limits staked.

False mallow with light green fruit and red leaves, growing in dolomitic wetland.
